SUMMARY

Passionate AI and Machine Learning student with a strong foundation in Data Science, Statistics, and Python programming. Experienced in building machine learning projects, conducting data analysis, and developing AI-powered applications using tools such as Scikit-learn, Pandas, and Streamlit.

Through programs including DECI, AWS AI & ML Scholars, GDSC E-JUST, ML-Hub, and the New York Academy of Sciences Junior Academy, I have gained hands-on experience in machine learning, deep learning, data visualization, and problem-solving.

My goal is to continue advancing my expertise in Artificial Intelligence and contribute to impactful real-world solutions while pursuing opportunities in research, innovation, and technology.

PROFESSIONAL EXPERIENCE

Level 5 Student – Advanced Data Science & AI Trainee 04/2026
Digital Egypt Cubs Initiative (DECI)

Studying advanced Machine Learning, Deep Learning, Computer Vision, and Large Language Models (LLMs). Building AI projects using industry-standard tools and applying AI solutions to real-world problems.

STEM Program Participant – Junior Academy 01/2026
The New York Academy of Sciences

Selected for an international STEM program bringing together students from around the world. Collaborating on innovative solutions to global challenges while developing research, teamwork, and problem-solving skills.

Level 5 Student – Data Science & AI Trainee (Huawei Program) 12/2025 – 04/2026
Digital Egypt Cubs Initiative (DECI)

Advanced training in machine learning and AI systems with industry-aligned projects and technical mentorship.

GDSC DataCamp Student 04/2025 – 12/2025
Google Developer Student Clubs (GDSC)

Built practical ML foundations through hands-on projects in data preprocessing, feature engineering, and model building.

AI & ML – Summer Camp 07/2025 – 08/2025
Sprints × Microsoft

Worked on applied machine learning concepts including feature engineering and boosting techniques in real-world style projects.

AWS AI & ML Scholar 05/2025 – 08/2025
Amazon Web Services (AWS)

Completed AI and Machine Learning training through the AWS Scholars Program and applied machine learning concepts through hands-on projects.

Level 4 Student – Data Science & AI Nanodegree 11/2024 – 10/2025
Digital Egypt Cubs Initiative (DECI)

Built strong foundations in statistics, machine learning, regression models, and data analysis with real-world datasets.

Level 3 Student – Data Science & AI Nanodegree 12/2023 – 10/2024
Digital Egypt Cubs Initiative (DECI)

Learned core data analysis and EDA using Python, including data visualization and early machine learning concepts through hands-on projects.

KEY CERTIFICATES

Machine Learning Specialization (3-course series) — DeepLearning.AI

Level Four: Data Science and AI Graduate (DECI & Udacity Program) — DECI

Advanced Learning Algorithms — DeepLearning.AI

Unsupervised Learning, Recommenders, Reinforcement Learning — DeepLearning.AI

Supervised Machine Learning: Regression and Classification — DeepLearning.AI

Intro to Machine Learning — Kaggle

Intermediate Machine Learning — Kaggle

Intro to Deep Learning — Kaggle

AI & ML Summer Camp — Sprints × Microsoft

Generative AI with AWS — Udacity

Supervised Learning with Scikit-Learn — DataCamp

PROJECTS

Breast Cancer Prediction

A deployed machine learning web application that predicts breast cancer using trained models with a simple user interface built in Streamlit. Focused on real-world medical classification use cases.

Heart Disease ML Pipeline

Built a full machine learning pipeline using real-world healthcare data, including preprocessing, model training, evaluation, and deployment-style workflow. Developed during Sprints × Microsoft program.

Wasalny – Egypt Transportation Platform

HTML-based web project designed to explore transportation challenges and present a conceptual solution for route planning in Egypt.

AI Mental Wellness Assistant – MindHeal AI

Developed a calming AI-based web application designed to simulate supportive mental wellness interactions with a friendly digital assistant interface.

A/B Testing & Statistical Decision System

Performed full statistical analysis of A/B testing results including hypothesis testing, probability analysis, and logistic regression to evaluate product performance and decision outcomes.

Data Insights: Ford GoBike Usage Analysis

Explored real-world transportation data to uncover user behavior patterns, peak usage trends, and mobility insights using EDA and visualization techniques.

Data Wrangling & Twitter Analysis (WeRateDogs)

Data cleaning and exploratory analysis on Twitter dataset to extract insights about user behavior and engagement patterns.

Movie Dataset Analysis (TMDB Insights)

Analyzed movie dataset to explore trends in genres, production costs, and ratings using basic data analysis techniques.
